Case Study no 2019/09/27

Traceability of Costs using Procedures as an example

Tracing Costs For A Procedure End-To-End

1. Introduction:

The purpose of this case study is to show how costs associated with a specific procedure are traced backwards to their source, so that a user can understand how the costs shown in IntelliMax are built up from underlying cost structure.

Consider the following report, which shows products or outputs associated with different equipment items

“Products By Equipment - Patient Measure Detail” under
->Technology->Reporting

Double-Clicking on a cell shows the patient lines for the equipment-procedure combination:

- Note that the rate for this procedure is \$433 – this case study is to show how this cost is derived.

- Note that the product shown, “FastNeutrTherapySess”, is a form of cancer treatment which uses specialized equipment. Product in this case study is understood to be a Procedure that the hospital will charge for.

2. The “FastNeutrTherapySess” product

Consider the following cost listing as shown in the Costing section of IntelliMax:

Code	Cost Object Type Code	Cost Obj	N	FP	W	Amount In	Amou	Rate	Qty	WF	Cap
Business Unit : Hospital 5 (4 items)											
Cost Object Type : RTH04 - Radiology (33 items)

The technician costs consists not only of the Payroll costs but also the cost of all support services the technicians receive.

4.2. The Radiology Information System

Similarly, the following shows the situation for the Radiology Information System

Code	Name	# Of Resources	Qty	Amount In	Amount	Weighted Qty	BookValue	Depreciation	Cost To Co
Business Unit : Hospital 1 (3 items)		9.00		1,688,000.00	\$769,587.92	\$644.15	1,688,000.00	0.00	5.00

- Note that the Radiology Information System takes costs from various IT-related sources, and passes those costs on to various kinds of equipment that use the Radiology Information System for storage, communication and analysis.

4.3. The Radiology Block (Premises)

This is the cost associated with the premises which houses the equipment

- The Radiology Block takes costs from Hospital 5 Buildings, which in turn, takes the kind of costs one would expect to see for buildings:

- Note that, upon reaching the GL accounts, the chain of costs has reached the point where the cost enters the IntelliMax costing system.

5. Conclusion

IntelliMax allows a user to trace costs from specific procedures (or products) that took place during a particular patient's visit, through intermediate steps, all the way back to the original General Ledger accounts which record the costs the Hospital has to cover in order to provide the service in question.
